Art Unit: 1795

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 24 is rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. (New Rejection)

With the fluid being the electrolyte liquid, the last two lines of claim 1 would not operate and would not work. The electrolyte liquid cannot reversibly change a degree of penetration on itself.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. (New Rejection)

Each of claims 24-26, line 1, recite a method. There is no proper antecedent basis for this word in these claims.
